(54) WATERPROOF STRUCTURE OF VERTICAL OUTER WALL JOINT

(57)Abstract:

PURPOSE: To allow easy and quick construction, and attain perfect and sure waterproofness against violent wind and rain.

CONSTITUTION: In the waterproof construction of a vertical outer wall joint M formed between a wall panel 4a and the adjacent wall panel 4b, a pair of thin plate throating materials 6a, 6b are adhered and fixed to the vertical header surface of the wall panel 4a and the vertical header surface of the adjacent panel 4b which are mutually opposed with a joint clearance G through butyl rubber 5a, 5b. The throating materials 6a, 6b have fitting pieces 62a, 62b formed by curling in a curved state toward the mutually opposed sides and the outdoor side in respective prescribed indoor side positions. A gasket 7 is press-fitted between the throating materials 6a, 6b from the outdoor side, and the fitting pieces 62a, 62b are nipped by nipping pieces 74b, 74b provided on the indoor side top end of the gasket 7.
